

UPS Batteries UPS Battery Replacement

UPS Batteries UPS Battery Replacement

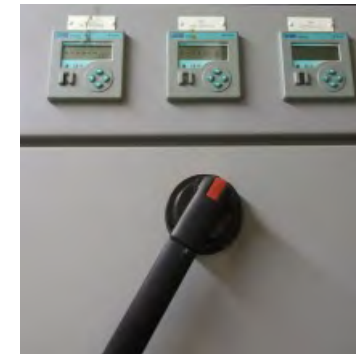

Power Continuity supplies battery replacements for UPS systems throughout the United Kingdom. Work is carried out by UPS engineers with over 20 years unequalled experience in their field, fully trained to complete battery builds and battery replacements, on time and in budget.

Our comprehensive range of services and service options provide our customers with more than just significant added value, rather a one stop for worry free power protection.

Power Continuity, the ultimate service provider for the supply and replacement of UPS Batteries.

UPS Batteries & Battery Replacement

Battery Builds

UPS Batteries have a fixed working life with the design life being normally either 5 or 10 years (although due to various use factors, these design lives are never really fully achieved). If not replaced, the batteries' capacity will be severely reduced and in time overheating can occur that could cause a fire.

PowerContinuity Systems take away your old batteries and dispose of them in accordance with Environmental Best Practice. Whether in cabinets or open racks, our experienced engineers will carry out the work efficiently and safely within working hours or out of hours.

Power Continuity will ensure your Power Protection systems are fully operational guaranteeing your business continuity.

UPS Battery Testing

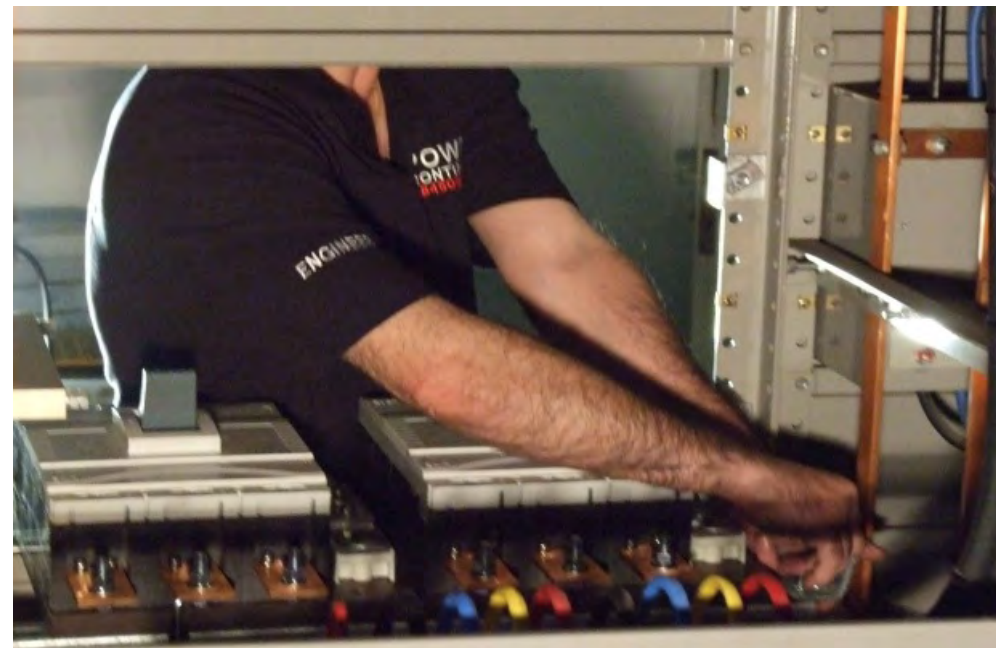

PowerContinuity Systems can carry out battery testing as part of our six monthly servicing visits to your UPS systems. Carrying out regular (every six to twelve months) controlled battery discharge and impedance testing allows the condition of the batteries to be carefully monitored. This gives an early indication of the need to replace batteries eliminating the risk of them failing when they are needed the most. Remember that out of sight shouldn't be out of mind; what you can't see needs regular maintenance too.

UPS Maintenance

PowerContinuity can carry out all types of UPS maintenance including:

- Battery replacements
- Battery testing
- UPS testing
- UPS component replacements
- UPS Servicing

Health, Safety & Environmental

PowerContinuity Systems take Health and Safety very seriously. Our engineers are fully competent and trained in safe working practices to ensure their own safety, as well as that of others attending the installation; this is shown in our industry leading health and safety performance. Before the works commence, we will issue our Safe Systems of Work for the project.

Additional Services

PowerContinuity Systems do not just carry out UPS Battery Builds and Replacements; we are 'The Power Protection Partner'.

We cater for all your power protection requirements:

- Generator Installations
- Diesel generator Servicing & Maintenance
- UPS Installations
- UPS Servicing & Maintenance
- Alternative Energy Solutions
- IT/Comms Room Services

Contact our Customer Services team today for a survey of your power protection systems.

Let's keep your Power Protection system in 100% operational status and eliminate risk of failure.
