# UPS Maintenance

Power Continuity can service and maintain your UPS systems throughout the United Kingdom. Work is carried out by UPS engineers with over 20 years unequalled experience in their field, fully trained to service your UPS in accordance with the manufacturer's specifications.

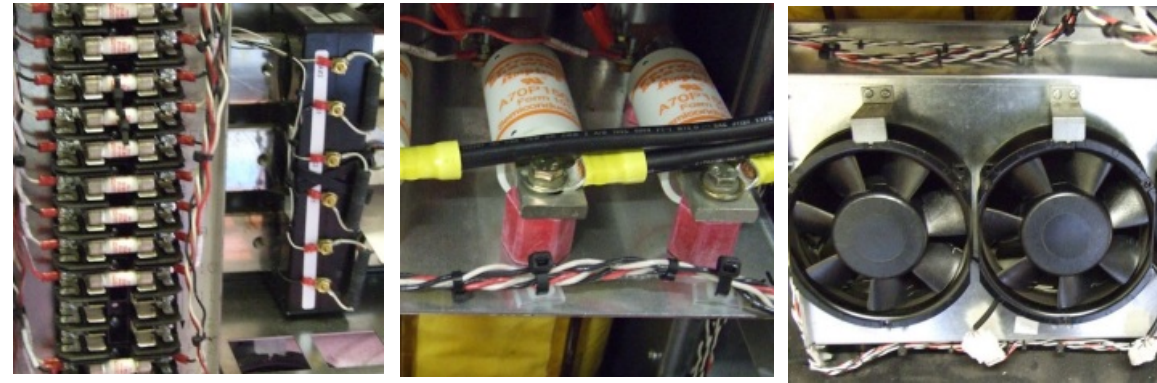

We offer a comprehensive range of services and service options providing our customers with real added value at the cutting edge of Power Protection.

Power Continuity Systems, the ultimate in UPS Maintenance and power protection systems.

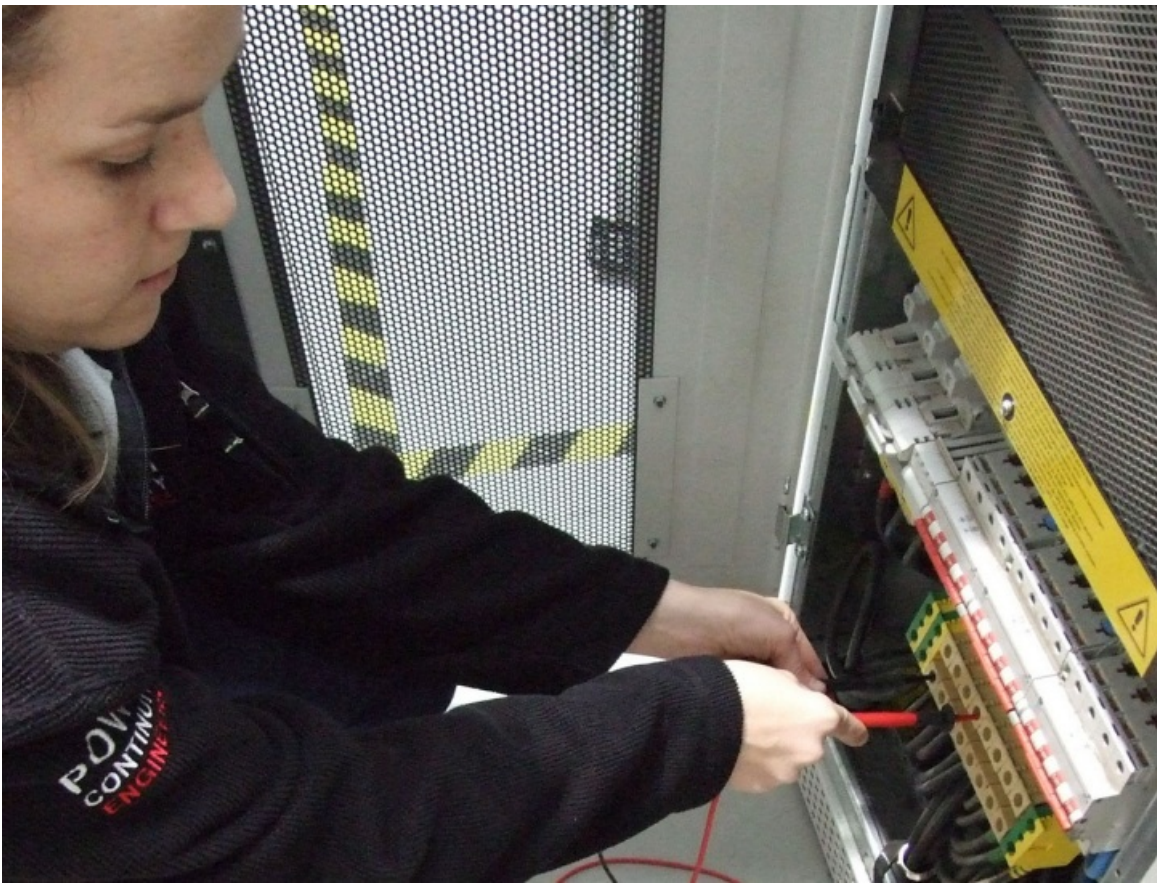

# UPS Maintenance

# Leading UPS makes covered for maintenance

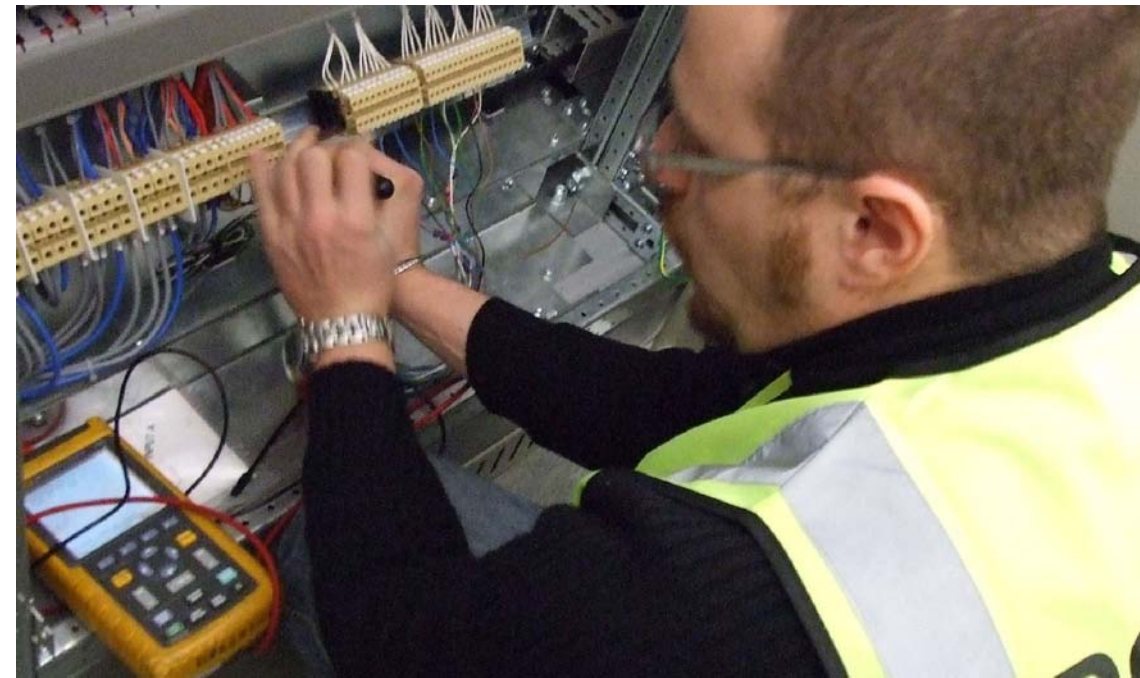

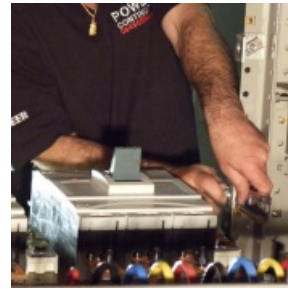

PowerContinuity Systems have established an industry leading reputation within the power protection sector for reliability and high levels of customer service, covering all aspects of power protection maintenance. PCS work closely with all leading UPS manufacturers not just one.

# UPS Repairs

UPS servicing and maintenance is absolutely necessary in order to keep your UPS systems in optimal performance. All servicing and maintenance is carried out in accordance with the UPS manufacturer's specifications and requirements by fully trained and qualified engineers.

Power Continuity System's network of specialist UPS System engineers can repair all UPS makes including the lesser known makes. Security of power requires a regular UPS servicing regime.

## Maintenance

PowerContinuity can carry out all types of UPS maintenance including:

- UPS Servicing
- Battery testing
- UPS testing
- UPS component replacements
- Battery replacements

# Location

UPS secure facilities and remote locations are all part of our UK maintenance services. We currently protect over 10% of the UK's end users.

**Out of Hours** All our contract customers have the comfort of a 4 - 6 or 8 hour response 24/7/365 to site together with our 24 hour helpline. There's always a specialist engineer here to help

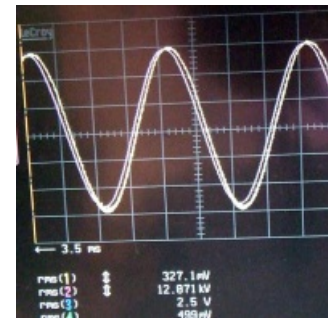

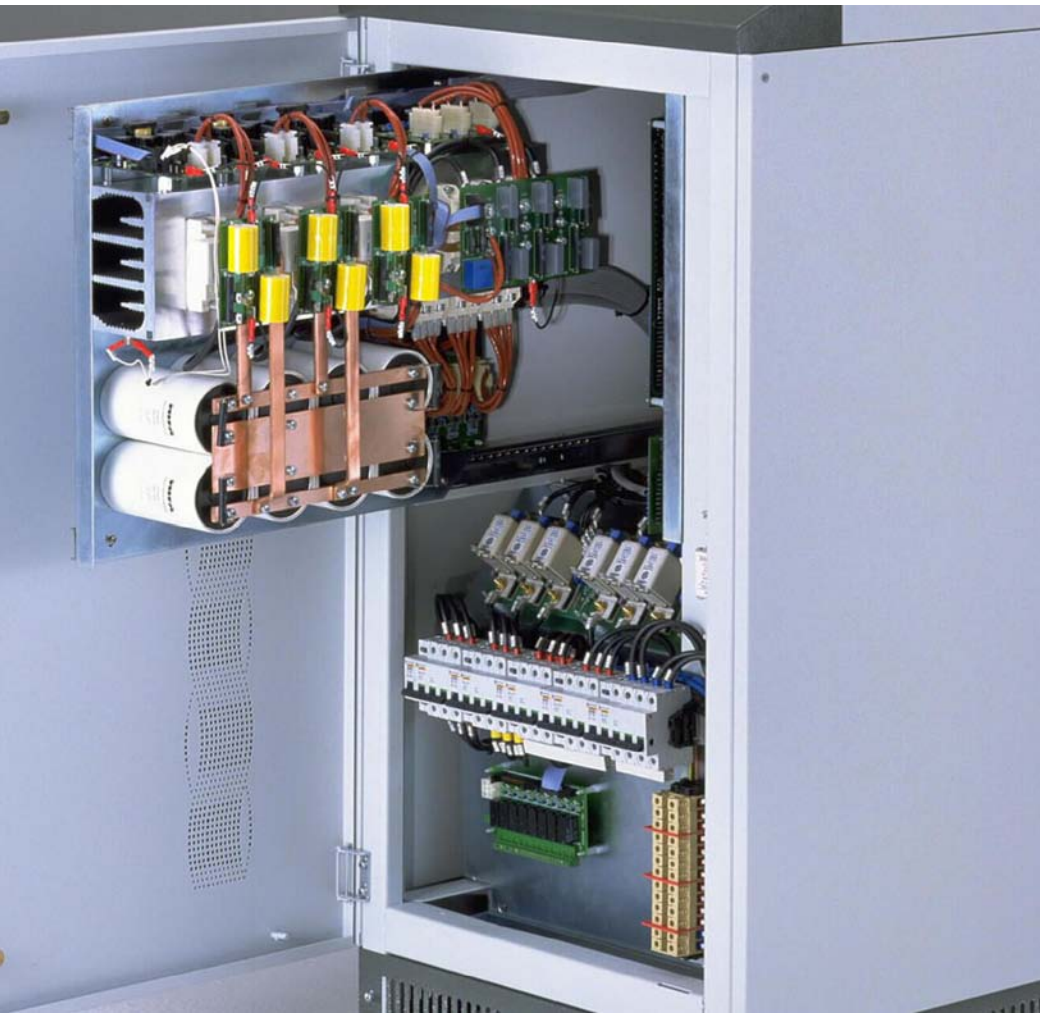

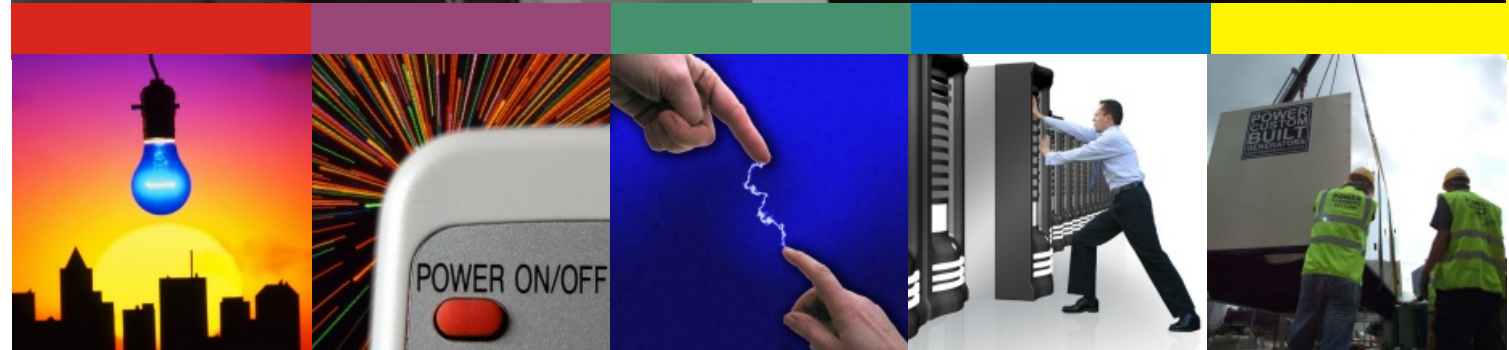

# Prevention

Prevention is better than cure. This is especially the case for power protection. A regular UPS maintenance regime makes economic sense as it will eliminate your UPS System's downtime and the negative effects that Power Failure can have on your organisation and operations. UPS maintenance will allow components to be replaced before they fail ensuring that your power remains protected.

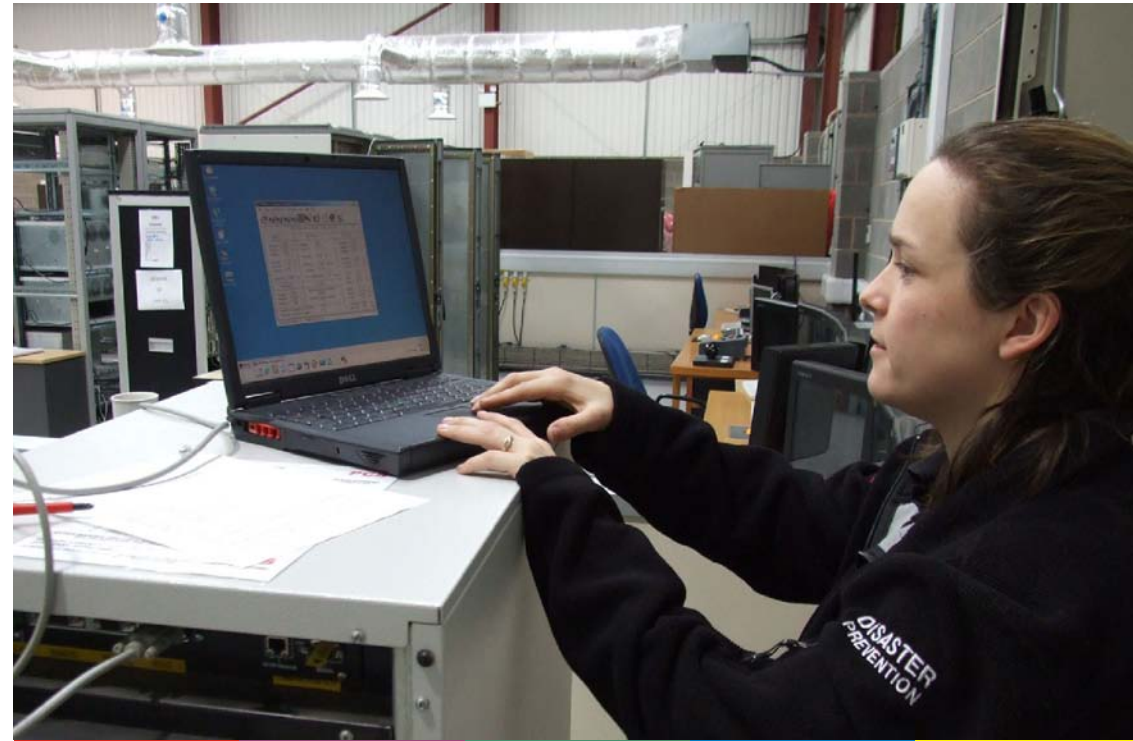

Power Continuity Systems provide bi-annual UPS service and maintenance visits every year for all your UPS equipment ensuring your power protection is in optimum condition.

For all your power protection requirements, contact PowerContinuity the Power Protection Partner.
