

UPS Removals Generator Removals

**UPS Removals
Generator Removals**

When failure is not an option™

Power Continuity Systems are your UPS Removal and Generator Removal specialists. From 20kVA to 5MVA, from rooftop to high security, Power Continuity will successfully fulfil your UPS and generator removal requirements.

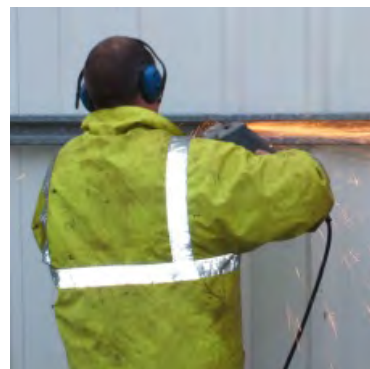

Our experienced teams, with over 20 years experience will guide you from the initial site survey and consultation through to decommissioning, lifting of power protection equipment and removal from site.

PowerContinuity Systems specialise in all types of UPS Removal and Generator Removal projects; we can de-commission and remove any generating plant regardless of how impossible it may appear to access and uninstall. There is not a generator too big nor access too limited for Power Continuity.

UPS Removals & Generator Removals

Location

Not every UPS or generator is easily accessible:

City Centre Roofs
Secure Facilities
Remote locations

Power Co
ntinuity has successfully carried out generator and UPS removals in all of the above situations and is happy to carry out these more demanding projects efficiently and safely.

No project is too difficult or demanding for PowerContinuity Systems. By carefully planning our works with the client, we can successfully complete projects with no disruption to the end users.

Complete Removal Solution

PowerContinuity Systems are 'The Power Protection Partner': we offer a comprehensive removal service including full project management, from survey to completion:

- Full planning including survey, schematics and Safe Systems of Work
 - Liaison with local authorities for road closures, etc.
 - All disconnection and de-commissioning works, ground works, cable removal
 - Lifting operations, craneage
 - Installation of new power protection equipment

Project Planning

Power Continuity will carefully plan the UPS or generator removal to ensure that there is no disruption to your operations whilst the decommissioning works are completed.

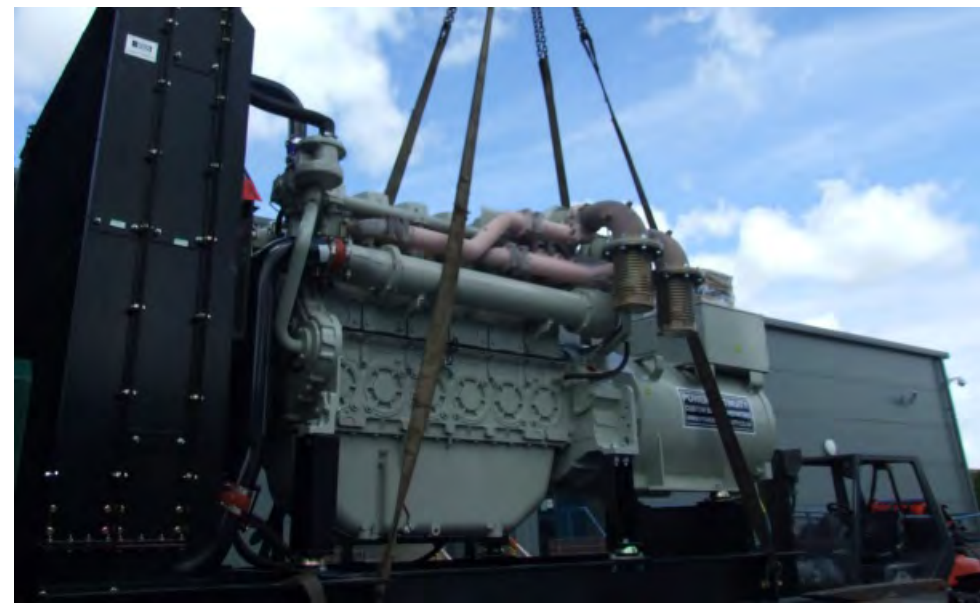

We can deal with all necessary permissions from the Local Authority including road closures and lifting over a highway.

Once a survey has been completed, we will prepare a bespoke method statement identifying how the removal works will be carried out.

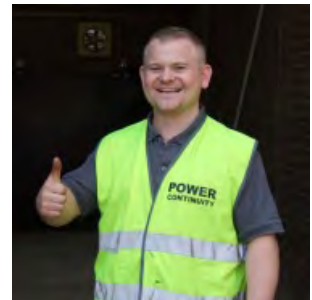

Health & Safety

PowerContinuity Systems take Health and Safety very seriously. Our engineers are fully competent and trained in safe working practices to ensure their own safety, as well as that of others potentially affected by the removal works; this is shown in our industry leading health and safety performance. Before the works commence, we will issue our Safe Systems of Work for the UPS or Generator Removal project

Environmental Responsibility

In this modern age organisations are giving more attention to the impact of their activities on the environment. PowerContinuity Systems stands out from the crowd. Our operations are managed by an Environmental Management System accredited to BS EN ISO 14001 and we are committed to attaining the highest available environmental standards, complying with existing legislation in every aspect of our work. As we find areas where we can improve our environmental policy we constantly make positive adjustments, so we can work in harmony with the environment whilst giving the best service to our clients

Generator & UPS Installations

Whilst we are onsite removing your existing UPS and generator, it makes perfect sense for us to install your new power protection systems.

PowerContinuity Systems deal with all the leading brands of Uninterruptible Power Supplies and diesel generator engines. Our team is fully trained and experienced to advise you as to the best option for your bespoke requirements.

We pride ourselves on the industry leading reputation we have with power protection guaranteeing exceptional customer service and added value. We already protect over 10% of the UK's end users each and every day.

PowerContinuity Systems do not just carry out UPS and Generator Removals: we are 'The Power Protection Partner'.

We cater for all your power protection requirements:

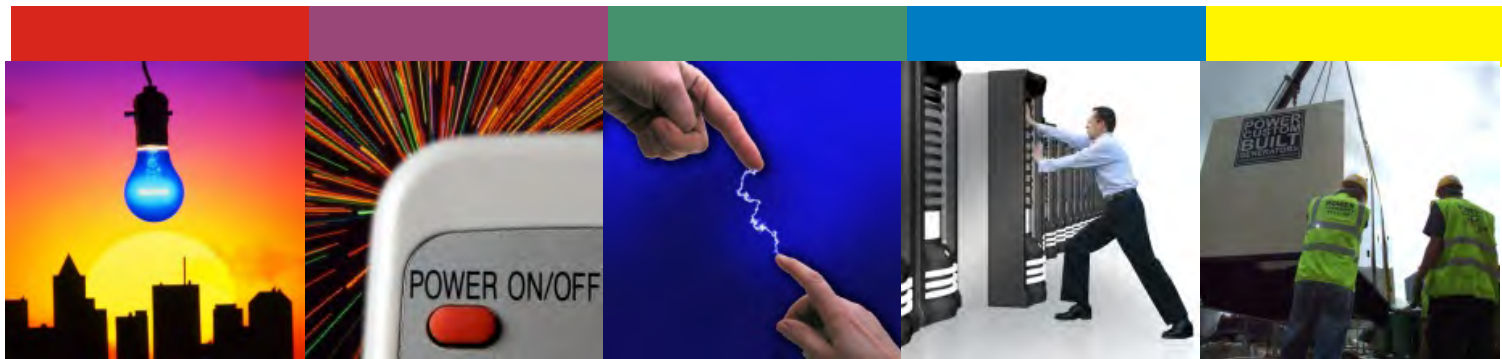

- Generator Installations
 - Diesel generator Servicing & Maintenance
- UPS Installations
- UPS Servicing & Maintenance
- Alternative Energy Solutions
- IT/Comms Room Services

Contact our Customer Services team today for a survey of your power protection systems. Let's keep your Power Protection system in 100% operational status and eliminate risk of failure.
